

Task 3 Further analysis & solution presentation

We are up to the final phase of our engagement with SectorMetric. This is where we present SectorMetric with our research on technological solutions and their appropriate providers. We must also conduct an initial feasibility assessment and a high-level implementation plan for integrating the technology solution.

Analysis-

We have also taken more deployment measures into consideration and tried to arrive at a conclusion. The integration of Accounting software with a cloud based solution will be done best on an ERP platform.

Usage of Enterprise Resource Planning boosts efficiency streamlines the business process and makes it easier for companies to manage their data, records and information.

Platform	Costing	Comments	Benefits
SAP Business One	Medium	The product is cost effective and offers customized solutions as per requirement. The product has their focus on Ease-of-Use, Business Processes, Crystal Reports and Analytics, System Architecture and Performance, Implementation and Maintenance, Integration and Collaboration	Good
Epicor ERP	Low	Epicor ERP is designed for medium-sized businesses across a wide range of industries, with the highest adoption rates belonging to manufacturing and project-centric organizations. Its partnership with Microsoft Azure enables them to provide capabilities for analytics and expand the training-on-demand offerings.	Good
Oracle ERP	High	Oracle ERP provides a single location to manage and look at business processes across an organization. It allows users to visualize real-time information using dashboards. It also contains advanced financial management tools to streamline workflows and improve revenue.	Average

What is Microsoft Dynamics ERP	Medium	The use of various elements of Microsoft Dynamics ERP allows users to conduct research, gather business intelligence, and apply it to business processes. Microsoft Dynamics AX helps with coordinating business activities around the world. Microsoft Dynamics GP can help provide insight into markets, with the ERP product features that help to look at business requirements and more. Microsoft dynamics NAV helps with industry-specific aspects of business operations.	Very Good
--------------------------------	--------	---	-----------

After analysis of all the Cloud Based platforms for ERP, it can be concluded that Microsoft Dynamics ERP be used to manage the financial processes.
